// **LANGUAGES****French** : Native**English** : B2 - Professional working proficiency.// **TECHNICAL SKILLS**

<DATA & AI>

Python (Pandas,NumPy, Scikit-learn),Machine Learning,EDA.

<DATA ENGINEERING & BI:>

Talend (ETL), Data Warehousing, Power BI.

<PROGRAMMING>

Java, C++, React-Redux, HTML/CSS, REST APIs.

<DATABASES>

PostgreSQL, MySQL, MongoDB, Oracle,SQL

<TOOLS & METHODOLOGIES>

Agile (Scrum),Git, UML Design, Postman.

// **SOCIAL & CULTURAL
EXPERIENCE**< Head of Foreign Affairs />
@AESAT - Tunisia

>_ Led international relations and intercultural student initiatives.

< Secretary General />

@CESGUIT - Tunisia

>_ Coordinated student activities and represented the student body.

<p>

>_ Profile: Data & AI engineering student passionate about interculturality and problem-solving.

>_ Objective: Seeking a 6-month international internship in Data Science & AI (starting in January) to apply my skills in Machine Learning and Data Engineering.

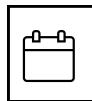

</p>

// **EDUCATION****Engineering Degree in Computer Science (English Section)** **CESI Engineering School**
2025 – Present
Lyon, France

>_Advanced algorithmics, statistics, big data, machine learning, AI integration.

Bachelor in Computer Engineering & Software Engineering**EPI DIGITAL
SCHOOL**
2021 – 2023
Sousse, Tunisia

>_ Software design, programming languages, IT project management

Higher Technician in Home Automation**CSFMI de Khniss**
2018 – 2020
Monastir, Tunisia// **ACADEMIC & TECHNICAL PROJECTS****Employee Turnover Prediction (Machine Learning)**

- Analyzed anonymized HR data, cleaned and merged multiple datasets.
- Trained supervised classification models and evaluated their performance.
- Integrated ethical considerations regarding data privacy, bias, and responsible AI.

Healthcare Data Engineering & BI (ETL & Data Warehousing)

- Designed ETL pipelines using Talend to centralize hospital consultation histories.
- Performed data profiling (Python) and modeled a Data Warehouse (constellation schema).
- Applied strict GDPR anonymization protocols before creating SQL metrics.

Vehicle Routing Optimization (Operations Research)

- Modeled a Vehicle Routing Problem (VRP) on weighted graphs.
- Implemented a Python solver, integrating realistic constraints and analyzing experimental performance.

// **PROFESSIONAL EXPERIENCE**< **Web Developer Intern (Symfony/Angular)/> 02/2026 – 04/2026**^ **@ Sonoya Technology – Kaloum, Guinea**

- >_ Developed REST APIs for data management on a project tracking platform.
- >_ Implemented dashboards and KPIs to analyze project costs and progress. Tested APIs with Postman.

< **Frontend Development Intern (React/Redux)/>06/2023 – 07/2023**^ **@ Software and Security Solutions – Gafsa, Tunisia**

- >_ Designed and developed a management interface for a hardware store.
- >_ Implemented functional features using React/Redux and strengthened version control skills with Git.
